TEAM INITIATORS · DISTRICT IQ REVIEW · 18 OCT 2026, 4:45 PM

Prep plan and checklist

From now to 4:45 PM

Time	[Friend's name]	[Your name]
1:45 – 2:15	Read the intro script aloud twice. Mark where you breathe.	Read the demo script once while clicking through the live site.
2:15 – 3:00	Study guide: the big picture, data collection and "the data, stated honestly". Learn the four ideas by heart.	Study guide: pipeline steps 1–12, priority table, Ask District IQ steps.
3:00 – 3:30	Full rehearsal together, with a timer: intro, handover, demo. Note where you overrun.	
3:30 – 4:00	Question drill: one asks from tab 5, the other answers without looking. Swap. Learn the glossary terms you stumbled on.	
4:00 – 4:15	Second rehearsal, short version only (parts 1, 3, 4, 8, 11).	
4:15 – 4:40	Set up (checklist below). Then stop studying.	

Set-up checklist (4:15 PM)

☐ Get fresh AWS keys from the portal and install them: in `chennai-grievance-portal-main`, run `npm run ai:key` (it tests Bedrock and prints only the last 4 characters).

☐ Start the site (`npm run dev`) and open the Collector console. The "Collected" chip should say all feeds are current.

☐ Sign in with the Collector account (not on a shared or recorded screen).

☐ Ask District IQ one warm-up question so the search model is loaded.

☐ Pick the severe incident you will open in Part 4, and check that it has evidence, a timeline and Take action.

☐ Copy one public link for Part 9 (for example an RSS feed URL) to paste.

☐ Open the citizen portal and officer console in separate tabs.

☐ Close other apps and notifications. Set the browser zoom so the whole Overview fits on the shared screen.

☐ Keep this page open on a phone as your prompt.

Handover and speaking tips

- Handover line, word for word: "With that, I will hand over to [your name], who will show you the live system." Then: "Thank you, [friend's name]."
- Say "we", not "I": you are a team.
- When you click, say what you are clicking before the screen changes.
- Round every number and say "about". Never read a number off the screen you are not sure of.
- If you don't know an answer: "We haven't measured that yet. What we did measure is …"
- Don't call simulated data real. Reviewers respect honesty more than big numbers.
